RECENT CYBER ATTACKS (AUGUST 2024)

NPD Data Breach Exposed 110 Million Pennsylvania Records

01

A recent data breach at the NPD Group, a leading market research firm, has resulted in the exposure of sensitive information belonging to approximately 3.5 million individuals. The compromised data includes names, addresses, and phone numbers, potentially putting those affected at risk of identity theft, and other malicious activities.

Exotel Hit by Data Breach

02

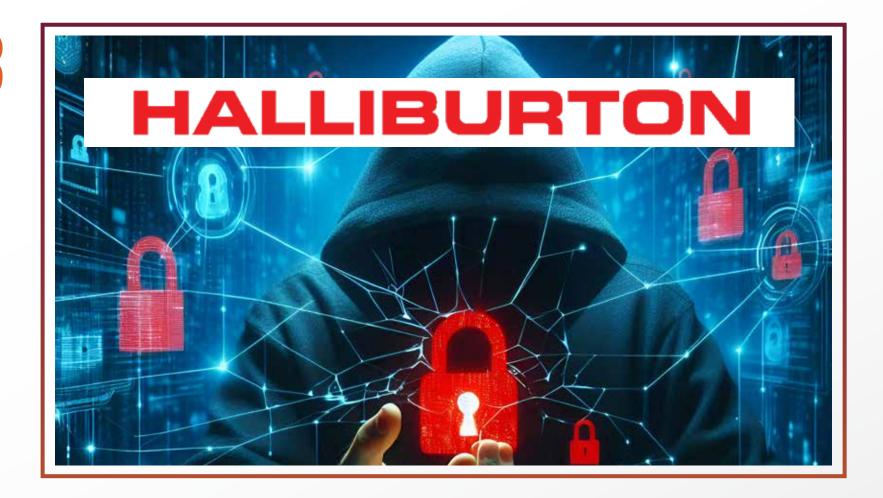

Exotel, a leading cloud telephony platform, recently faced a data breach that exposed customer data. The company swiftly responded by implementing security measures to mitigate the impact and safeguard its systems. Exotel has assured its customers that their data is secure and has strengthened its cybersecurity protocols to prevent future breaches.

Halliburton Hit by a Cyberattack

03

Halliburton, a major oilfield services company, reportedly suffered a cyberattack that may have exposed sensitive internal data. The attack underscores rising cybersecurity threats in the energy sector. Halliburton has not yet confirmed specific details about the breach but is actively investigating the incident and working to enhance its cybersecurity defenses.

Qilin Ransomware Hits VPNs, Steals Chrome Data

04

A new Qilin ransomware attack has emerged, targeting networks through compromised VPN credentials. Detected in July 2024, attackers used stored credentials from Google Chrome. They utilized a Group Policy Object to deploy a PowerShell script for credential theft. This led to significant data breaches before encrypting files and demanding a ransom.

Toyota Confirms Data Breach After Hacker Leaks 240GB Information

05

Toyota has confirmed a data breach after a hacker exposed 240GB of company data. The leaked information includes sensitive data, though Toyota stated there is no evidence of customer data being compromised. The company is investigating the incident and working to enhance its cybersecurity measures.

Don't wait for cyber threats to strike.
